Renee,

We are comfortable with the removal of the mechanical screen at the shown location. I will add a copy of this e-mail and the plan to the file to track the change.

Thank you for taking the extra time to put together the perspectives for us. They were very helpful.

Have a wonderful weekend.

Sarah

Subject: The Fowler - Roof Screen

Hi Sarah,

Attached is a diagram of the roof screen we are proposing to remove from the Fowler.

Because of changes in the air handling unit sizes they will no longer be visible from across the street – we've attached model views to illustrate.

Let me know if this is acceptable to Design Review.

The unit extends 5'-7" above to top of parapet – however it is not visible from the sidewalk across the street, which was the criteria set up for all the units on the building early on.

Let me know what you think.

Thanks,

Renee
