

Re: Permit # CUP18-00037

Subject: Lomas letter of opposition #3 – Pictures of the actual Bown Traffic

To whom it may concern

I would like to be officially on record as against this requested conditional use permit to provide far less parking than is specified in city code.

I live and work immediately next door to the permit lot in question and have since April 2007.

Given the flawed nature of the CUP applicants provided parking study, I thought it would be helpful to capture some real-world images of the Bown Crossing traffic and parking situation over the course of the last 6-8 months at various times and days.

In the following 18 pages I've put together photos showing that.

Honestly speaking, I followed no particular schedule other than "when I thought to do it" and I took out my cell phone and snapped pictures. Sometimes I was driving away or arriving or just upstairs doing work and the following photos are the result. The only editing to the photos was cropping and adding some shadow light where needed so it was easier to see all the cars and traffic.

I have all the original photos with their embedded metadata to verify location, time and date of every picture. Those are available to anyone who wants them.

Thank you for taking the time to view the photos read and file my concerns in this matter.
