

To: City of Boise Design Review
From: Mister Car Wash 1790 Broadway Ave
Date: September 2, 2011

This is the detailed letter informing you of our intention.

We would like to move the existing free vacuum system from its existing location to the east end of the property to be in compliance with the city ordinance referring to gateway streets. We will move the existing parking stalls to where the existing vacuums are so we will not lose any parking spaces. As per the site plan we will landscape with lawn from the city property line back 21 feet to be within the set back, we will also erect the existing vacuum arches at 21 feet.

With the offering of the free vacuums we can better serve our existing customers and be able to offer what the other car washes in Boise offer.

Please see attached site plans.

Thank You
Phil DeLarosa
